

Getting checked for breast cancer is important.

If you are 50 or over talk to your family doctor or nurse practitioner about getting checked for breast cancer.

Getting checked for breast cancer

Regular screening is important because it can find breast cancer early when treatment has a better chance of working.

More people in Ontario survive breast cancer than almost every other cancer.

Talk to your family doctor or nurse practitioner

The Ontario Breast Screening Program provides breast screening throughout Ontario to eligible people.

No screening test is perfect. Talk with your family doctor or nurse practitioner about your breast health and screening test options.

Visit cancercareontario.ca/breast to find your **closest screening site** and for more information about the Ontario Breast Screening Program. To book your mammogram, call **1.800.668.9304**. A referral from a family doctor or nurse practitioner is not required.
