

Cancer Care Ontario

Get ready for FIT

(fecal immunochemical test)

A new screening test for colorectal cancer in Ontario

Cancer Care Ontario is implementing FIT as part of its colorectal cancer screening program, ColonCancerCheck. FIT will be replacing gFOBT.

FIT is the best screening test for your patients at average risk for colorectal cancer.

The FIT Resource Hub contains information and tools to prepare primary care providers, endoscopists, gastroenterology nurses and others for the transition to FIT. Visit the FIT Resource Hub at cancercareontario.ca/FITHub

Resources to be posted on the FIT Hub include:

- ColonCancerCheck recommendations
- FIT requisition form
- Participant instructions for completing FIT
- Educational videos to support endoscopy skills enhancement
- Frequently asked questions—**and more!**

Do not delay!

Continue to screen your patients with gFOBT until FIT is available through the ColonCancerCheck program.
