

## Ontario Breast Screening Program (OBSP) Screening Breast Ultrasound Report Template (Dictated)

This template provides guidance for sites to incorporate OBSP screening results into dictated reporting software. Terminology used in the template aligns with the Integrated Client Management System (ICMS) and the Breast Imaging Reporting and Data System (BI-RADS) Atlas 5<sup>th</sup> edition. Where appropriate, terminology will be updated to align with the BI-RADS Atlas 6<sup>th</sup> edition when available.

Elements required in dictated reports	Description of information to be included
<b>Indication</b>	Identify the screen as an OBSP screening ultrasound
<b>Compared to previous imaging</b>	State whether the ultrasound was compared to previous imaging, or if it is an initial screen
<b>Technique of breast ultrasound examination</b>	Describe the technique used as per your site
<b>Breast Composition Category:</b> Use BI-RADS classification	Describe the breast composition as it appears on ultrasound using one of the following BI-RADS categories:  A: Homogeneous background echotexture-fat B: Homogeneous background echotexture-fibroglandular C: Heterogeneous background echotexture
<b>Breast Implants (if present)</b>	Include findings (if any)
<b>Findings: Right breast</b>	<p>If findings exist for the right breast, indicate:</p> <ul style="list-style-type: none"> <li>• Finding 1 (Reason 1) – Pick one of the following: <ul style="list-style-type: none"> <li>○ Solid mass</li> <li>○ Concerning complex cyst</li> <li>○ Intra-ductal nodule</li> </ul> <p><b>Include:</b> size, location, and lesion description (e.g., use the most applicable BI-RADS terminology)</p> </li> <li>• Finding 2 (Reason 2) – Pick one of the following: <ul style="list-style-type: none"> <li>○ Solid mass</li> <li>○ Concerning complex cyst</li> <li>○ Intra-ductal nodule</li> </ul> <p><b>Include:</b> size, location, and lesion description (e.g., use the most applicable BI-RADS terminology)</p> </li> </ul> <p><b>Note:</b> This terminology aligns with ICMS.</p>
<b>Findings: Left breast</b>	If findings exist for the left breast, indicate:

Elements required in dictated reports	Description of information to be included
	<ul style="list-style-type: none"> <li>• Finding 1 (Reason 1) – Pick one of the following: <ul style="list-style-type: none"> <li>○ Solid mass</li> <li>○ Concerning complex cyst</li> <li>○ Intra-ductal nodule</li> </ul> <p><b>Include:</b> size, location, and lesion description (e.g., use the most applicable BI-RADS terminology)</p> </li>   <li>• Finding 2 (Reason 2) – Pick one of the following: <ul style="list-style-type: none"> <li>○ Solid mass</li> <li>○ Concerning complex cyst</li> <li>○ Intra-ductal nodule</li> </ul> <p><b>Include:</b> size, location, and lesion description (e.g., use the most applicable BI-RADS terminology)</p> </li> </ul> <p><b>Note:</b> This terminology aligns with ICMS.</p>
<b>Impression</b>	<ul style="list-style-type: none"> <li>• Normal or unremarkable screening breast ultrasound</li> <li>• Abnormal screening breast ultrasound</li> </ul>
<b>Assessment Recommendations</b>	<p>If normal, routine screening recommended.</p> <p>If abnormal, describe assessment recommendations:</p> <ul style="list-style-type: none"> <li>• Right breast (Y/N) <ul style="list-style-type: none"> <li>○ Core biopsy</li> <li>○ Follow-up ultrasound</li> <li>○ Surgical consult</li> </ul> </li> <li>• Left breast (Y/N) <ul style="list-style-type: none"> <li>○ Core biopsy</li> <li>○ Follow-up ultrasound</li> <li>○ Surgical consult</li> </ul> </li> </ul> <p><b>Note:</b> This terminology aligns with ICMS.</p>
<b>BI-RADS Assessment Category</b>	<p>Describe the assessment category using one of the following BI-RADS categories during screening:</p> <p>0: Ultrasound: Incomplete; need additional imaging evaluation</p> <p>1: Negative</p> <p>2: Benign</p>

Elements required in dictated reports	Description of information to be included
	<p>3: Probably Benign*</p> <p>4: Suspicious</p> <ul style="list-style-type: none"> <li>- 4A: Low suspicion for malignancy</li> <li>- 4B: Moderate suspicion for malignancy</li> <li>- 4C: High suspicion for malignancy</li> </ul> <p>5: Highly Suggestive of Malignancy</p> <p>6: Known Biopsy-Proven Malignancy (note: including for completeness but does not apply for screening breast ultrasound).</p> <p>*If short-term follow-up is recommended, this should be done outside of the OBSP. Please let referring primary care provider know if a referral is necessary.</p>
