

Medication Information Sheet

## **bortezomib** (bore-THE-zo-mib)

*This document provides general information about your medication. It does not replace the advice of your health care professional. Always discuss your therapy with your health care professional and refer to the package insert for more details.*

**Other Name:** Velcade®

**Appearance:** Colourless solution

### **What is this medication for?**

For treating patients with multiple myeloma and certain types of lymphomas.

### **What should I do before I have this medication?**

- Tell your doctor and pharmacist if you have/had significant medical condition(s), especially if you have / had:
  - Kidney, liver, lung or heart problems
  - High or low blood pressure
  - Bleeding problems
  - Problems with nerves in hands and feet (numbness or tingling), or
  - any allergies.

**Remember to:**

- Tell your health care team about all of the other medications you are taking.
- Keep taking other medications that have been prescribed for you, unless you have been told not to by your health care team.

### **How will this medication affect sex, pregnancy and breastfeeding?**

- The use of this medication in men or women may cause harm to the unborn baby if pregnancy occurs. Let your health care team know if you or your partner is pregnant, becomes pregnant during treatment, or if you are breastfeeding

## bortezomib

- If there is ANY chance that you or your partner may become pregnant, you and your partner together must:
  - **Use 2 effective forms of birth control** at the same time while taking this drug: Keep using birth control until **3 months** after the last dose. Discuss with your healthcare team.
- Do not breastfeed while taking this drug.
- Tell your doctor right away if you or your partner becomes pregnant.
- This medication may affect fertility (ability to get pregnant).

### How is this medication given?

- This drug is injected under the skin, or given into a vein over a few seconds.
- Talk to your health care team about your treatment schedule.
- A minimum gap of 72 hours between doses is required to avoid severe side effects.
- If you miss your treatment appointment, talk to your health care team to find out what to do.

### What else do I need to know while on this medication?

- Do not eat or drink grapefruit, starfruit, Seville oranges or their juices (or products that contain these) while on this treatment. They may increase side effects.
- This medication can interact with other medications and can result in the treatment not working as well or cause severe side effects.
- Make sure your health care team knows about all your medications (prescription, over-the-counter, herbals and supplements). Check with your health care team before starting or stopping any of them.
- **For mild aches and pain or fever:**
  - If you feel unwell, take your temperature before taking any medications for pain or fever. They may hide a fever.
  - You may take acetaminophen (Tylenol®) tablets. Ask your health care team about the right dose for you.
  - Ibuprofen (Advil®, Motrin®), naproxen (Aleve®) or aspirin (acetylsalicylic acid, ASA), including low dose aspirin for heart conditions, may increase your chance of bleeding. Talk to your health care team before you start or stop these medications.

July 2019

Page 2 of 15

- **Talk to your health care team or go to the closest emergency room right away if you have a fever.** See the [Fever](#) pamphlet for more information.

- If you are taking antidiabetic or steroid medications by mouth, monitor your blood sugar regularly since bortezomib may cause changes in your blood sugar levels.
- Green tea and vitamin C supplements have been shown to affect how bortezomib works. Avoid green tea and any drinks or foods that contain green tea during your entire bortezomib treatment. Talk with your cancer health care team before taking any vitamin C supplements.
- Exercise caution when driving or operating dangerous machinery while you are taking this drug as it can cause tiredness, dizziness, fainting or blurred vision.
- Drinking alcohol and smoking during your treatment may increase some side effects and make your medication less effective. Speak to your health care team about smoking and drinking alcohol while on treatment.

## What are the side effects of this medication?

The following table lists side effects that you may have when getting bortezomib. The table is set up to list the most common side effects first and the least common last.

It is unlikely that you will have all of the side effects listed and you may have some that are not listed. Read over the side effect table so that you know what to look for and when to get help. Keep this paper during your treatment so that you can refer to it if you need to.

<b>Very Common Side Effects (50 or more out of 100 people)</b>	
<b>Side effects and what to do</b>	<b>When to contact health care team</b>
<p><b>Fatigue</b></p> <p><b>What to look for?</b></p> <ul style="list-style-type: none"> <li>• Feeling of tiredness or low energy that lasts a long time and does not go away with rest or sleep.</li> </ul> <p><b>What to do?</b></p> <ul style="list-style-type: none"> <li>• Be active. Aim to get 30 minutes of moderate exercise (you are able to talk comfortably while exercising) on most days.</li> <li>• Check with your health care team before starting any new exercise.</li> <li>• Pace yourself, do not rush. Put off less important activities. Rest when you need to.</li> <li>• Ask family or friends to help you with things like housework, shopping, and child or pet care.</li> <li>• Eat well and drink at least 6 to 8 glasses of water or other liquids every day (unless your health care team has told you to drink more or less).</li> </ul>	Talk to your health care team if it does not improve or if it is severe

## bortezomib

*The information set out in the medication information sheets, regimen information sheets, and symptom management information (for patients) contained in the Drug Formulary (the "Formulary") is intended to be used by health professionals and patients for informational purposes only. The information is not intended to cover all possible uses, directions, precautions, drug interactions or side effects of a certain drug, nor should it be used to indicate that use of a particular drug is safe, appropriate or effective for a given condition.*

*A patient should always consult a healthcare provider if he/she has any questions regarding the information set out in the Formulary. The information in the Formulary is not intended to act as or replace medical advice and should not be relied upon in any such regard. All uses of the Formulary are subject to clinical judgment and actual prescribing patterns may not follow the information provided in the Formulary.*
