## Eligibility Form

## Durvalumab - Locally Advanced Unresectable or Metastatic Biliary Tract Cancer

(This form should be completed <u>before</u> the first dose is dispensed.)

1. Patient Profile							
* Surname:							
* Given Name:							
* OHIN:	* Chart Number:						
* Postal Code:							
* Height (cm):	* Weight (kg):						
* BSA (m <sup>2</sup> ):	* Gender: O Male	○ Female ○ Other					
* Date of Birth:							
	Day Month Year						
* Site:							
* Attending Physician (MRP- Most Responsible Physician):							
Requested Prior Approval  Yes * Patient on Clinical Trial Yes No							
Other (specify):							
Specify Arm:  Standard of care  Blinded / Unknow							
Prior Approval Re	Request						

	Select the appropriate	O 1-Unknown primary (submit pathology report	
pri	prior approval scenario:	and clinic note)	
		2-Clinical document review (identify the patient	
		history that needs to be reviewed against eligibility criteria in Additional Comments below)	
		3-Regimen modification - schedule (complete)	
		questions a and b)	
		4-Regimen modification - drug substitutions	
		(complete questions a and c)	
		5-Withholding a drug in combination therapy	
		from start of treatment (complete questions d, e	
		and f)	
		○ 6-Maintenance therapy delay (submit clinic note)	
		7-Prior systemic therapy clinical trials (complete	
		question g)  8-Modification due to supply interruption/drug	
		shortage	
		Other (specify)	
		- ((

i. Additional comments:						
2. Eligibility Criteria						
Durvalumab is used in combination with gemcitabine patients with locally advanced (not amena (BTC).						
Patients must have:  Unresectable or metastatic disease at initial diacompletion of adjuvant therapy or curative surgen A good performance status.	•	greater than	6 months after the			
3. Baseline Information						
a. ECOG Performance Status at the time of enrolment	O 0	O 1	O 2			
b. Is the patient transitioning from a private pay or compassionate program?	O Yes	O No				
c. If yes, please indicate the funding source	O Privat		ent support program			
d. If yes, please indicate the date of the last administered dose	Day N	Month Year				
4. Funded Dose						
Durvalumab 1500 mg* intravenously (IV) once every 3 chemotherapy) for up to 8 cycles, followed by durvaludisease progression or unacceptable toxicity.						
*For patients weighing less than or equal to 30 kg, a weight-based durvalumab dose of 20 mg/kg is used until weight increases to greater than 30 kg.						
[ST-QBP regimen code(s): One of CISPGEMC(W)+DURV, CISPGEMC+DURV, CBRPGEMC+DURV, followed by DURV(MNT) for use as maintenance]						
5. Notes						

- 1. Treatment with durvalumab (plus gemcitabine and platinum-based chemotherapy) is not to be used in patients with Ampulla of Vater (AoV) cancer.
- 2. BTC eligible subtypes are intrahepatic cholangiocarcinoma, extrahepatic cholangiocarcinoma, and gallbladder cancer.
- 3. Patients must receive at least 1 cycle of chemotherapy with durvalumab.

## 6. FAQs

1. My patient is currently receiving durvalumab through non-publicly funded means (e.g. patient support program, private insurance). Can my patient be transitioned to receive funding for durvalumab through the New Drug Funding Program (NDFP)?

Provided the eligibility criteria were met at the time of treatment initiation and the patient's disease has not progressed, your patient may be eligible for continued coverage of durvalumab through the NDFP.

2. What is the process for transitioning my patient from a non-publicly funded program to the NDFP?

If the patient meets all the eligibility criteria outlined in this policy, please submit as a regular eClaims enrolment.

Prior approval requests are reserved for instances where there is clinical uncertainty on eligibility. In these circumstances, please specify your reason(s) for uncertainty and upload the following:

- · A clinic note and imaging from treatment initiation, and
- The most recent clinic note and imaging (if applicable).
- 3. If a patient is not able to tolerate cisplatin-based chemotherapy, is it reasonable to combine durvalumab with alternate chemotherapy?

Durvalumab is only funded if used in combination with gemcitabine plus platinum-based therapy.

4. Can durvalumab be restarted if treatment was stopped for reasons other than disease progression?

Provided durvalumab was not stopped due to objective disease progression or unacceptable toxicity, the patient will continue to be eligible for durvalumab funding. If there is disease progression while on a drug holiday, durvalumab will only be funded in combination with chemotherapy.

5. Is durvalumab eligible for funding in patients currently on, or who have just completed a first-line chemotherapy regimen?

On a time-limited basis, patients who are currently receiving first-line chemotherapy (gemcitabine plus platinum) with no evidence of disease progression may add durvalumab. Patients who have completed first-line chemotherapy are not eligible for the addition of durvalumab.

## **Supporting Documents**

None required at time of enrolment.

In the event of an audit or upon request, the following should be available to document eligibility:

- Pathology report demonstrating histologically confirmed diagnosis of BTC.
- CT scans every 9 to 12 weeks indicating no disease progression.
- Instances where there is pseudoprogression:
  - · Clinic note documenting the assessment and decision to continue, AND
  - Confirmatory scan conducted preferably at 6 to 8 weeks but no later than 12 weeks after the initial disease progression to confirm the absence of true progression.
